EXPERIENCE

Freelance Web Developer

Ujjain, India

Full Stack Web Development

June 2024 – Present

- Built and shipped 15+ responsive business websites using HTML, CSS, JavaScript, Bootstrap, PHP, and SQL, adding enquiry, booking, and lead-generation modules that increased customer conversions.
- Established WhatsApp messaging and click-to-call integrations, directly resulting in a 20 percent decrease in customer wait times for support inquiries.
- Managed end-to-end deployment and hosting for 15+ client projects, and ran Google Ads campaigns (keyword targeting, negative keywords, landing-page optimization) that improved conversion tracking accuracy by up to 25%.

Web Development Intern

Ujjain, India

Alsoft Infotech and Multimedia Ltd

September 2025 – December 2025

- Completed a 4-month hands-on internship building responsive web pages and applying front-end web development fundamentals under senior developer guidance.
- Collaborated with a development team to debug and improve existing website components, strengthening code-review and version-control practices.

C++ Student Intern

Ujjain, India

C++ Programming

October 2024 – November 2024

- Constructed efficient C++ programs to tackle 60+ intricate algorithm problems, showcasing rapid learning and application of advanced programming concepts.

PROJECTS

AI-Powered Lead Generation Agent

Tech: Python, AI APIs, Automation, Gmail API

August 2026 – Present

- Built an AI automation agent that scans map-based data to identify local businesses without websites, automating lead discovery for 100+ prospects and reducing manual research time by 60%.
- Automated personalized website-concept generation and Gmail outreach with AI-generated messaging for 100+ leads, streamlining the end-to-end lead-generation pipeline.

Anita Tour and Travels Website

Tech: HTML, CSS, JavaScript, Bootstrap, PHP, SQL

April 2026 – Present

- Developed a fully responsive tour-and-travel business website with 5+ service listings, enquiry forms, and SQL-backed data storage.
- Added click-to-call and WhatsApp integration for direct customer contact, improving lead capture rate and cutting average response time by 40%.

AI-Powered FPV Drone

Tech: Embedded Systems, Computer Vision, Sensors

August 2025 – Present

- Contributed as a core team member on an MSME-supported AI-enabled FPV drone, working on embedded hardware, sensors, and flight-control integration.
- Created a computer vision pipeline that automatically identified and tagged 500+ distinct objects in aerial imagery, streamlining data analysis for autonomous applications.

Google Ads and Lead Generation

Tech: Google Ads, SEO, Conversion Tracking

November 2025 – Present

- Managed Google Ads campaigns across 3+ client accounts with keyword targeting and negative-keyword lists, optimizing landing pages to raise conversion rates by up to 20%.
- Applied SEO and conversion-tracking techniques to increase website visibility and boost customer enquiry volume by 30%.

Personal Developer Portfolio

Tech: HTML, CSS, JavaScript

July 2025 – Present

- Designed and deployed a responsive personal portfolio site showcasing projects, technical skills, and services, hosted live on Vercel.

Patent: SmartCartX – IoT-Based Smart Shopping Cart System

Tech: ESP8266/ESP32, RFID/NFC, IoT

- Designed an IoT-enabled smart shopping cart using ESP8266/ESP32, MFRC522 RFID/NFC readers, and a 16x2 I2C LCD to automate product scanning, itemized billing, and cloud-based purchase history.

RELEVANT COURSEWORK

Database Management Systems, Data Structures & Algorithms, Object-Oriented Programming, Artificial Intelligence, Machine Learning.
